—THE CALENDAR—

Registration: Wednesday, July 5th, begins at 9:00 a. m. Classes begin work Thursday, July 6th. The term ends Friday, August 11. Classes will recite Saturday July 8th and Saturday, July 15th. The school is open to teachers of experience and to those who are expecting to teach in September and also to others who have begun their training.

—FEES AND TUITION—

Owing to a greatly reduced appropriation a fee of \$20, payable at registration, will be charged students who are residents of the State of New York. An additional recreational fee of \$1 will be collected by the treasurer of the student organization to finance the program of recreation for the summer. The tuition for non-residents of the State is \$20 in addition to the fee.

—ATTENDANCE—

Students are expected to appear for registration on the specified date and to report for work promptly on Thursday July 6th.

—EXPENSES—

Board and room at \$8 per week for a limited number may be obtained at the Nu Sigma Chi House, one block from the Normal School grounds. For a five-day week, the charge is \$6.50. The house does not furnish bed linen or towels. Those who are interested should write to Miss Grace Muse, 52 Prospect Terrace, Cortland, New York.

Textbooks may be purchased from the school bookstore at reduced prices.

Medical examinations may be arranged by appointment. For these, no charge is made.

No extra charge is made for instruction in swimming and life saving.

For further information concerning the summer school, address

H. DeW. DeGroat, Principal
Cortland, N. Y.

------------	-------------	----------

Recitations in subjects carrying two hours of credit will be one hour in length except music and arts which will be one and one-half hours in length. Those carrying three hours of credit will be one and one-half hours in length.

—COURSES—

In the field of physical education special courses are offered in physical inspection, first aid and safety, organization and administration, anatomy, kinesiology, correctives, measurements in physical education, swimming, apparatus, stunts and individual practice. Three weeks each will be devoted to football and basketball. The theory in coaching will be in the hands of Mr. Carl Davis, an experienced and very successful coach in both sports.

For the last two years there has been considerable demand on the part of graduates of the three-year course in physical education for work of the fourth year, and a large group returned to carry on this work. The courses are so arranged that the graduates of the three-year course can start their fourth year in any summer. The special work to be offered this year will be: advanced oral expression, two hours, given by Mr. Ahlberg; modern social and economic trends I, three hours, given by Mr. Biddle; public school organization and administration, two hours, given by Dr. Brown; and intramurals, one hour, given by Dr. MacNeil.

Many Cortland graduates of the three-year general elementary course have been asking for subjects that may be applied toward fourth year credit. For two years a large number of three-year graduates have reported to take this work which may be started any summer. For the accommodation of those making such a request, courses this summer will be offered in: contemporary American drama, three hours, given by Mr. Ahlberg; contemporary world civilization, three hours, given by Mr. Biddle; and advanced human physiology, two hours, given by Mr. Bowers.

—COURSES NOT OUTLINED IN THE REGULAR CATALOGUE—

Diagnosis and Remedial Teaching, 3 hours, Miss Barber

The course diagnosis and remedial teaching will be repeated this year because of its deserved popularity in 1938. It will deal with the more common difficulties that face pupils in the elementary grades and seek to discover their causes and apply remedies. Special attention will be paid to discovering and overcoming difficulties in reading and arithmetic.

Demonstration, 1 hour, Miss Pierce and Miss Harriman

Demonstration classes in primary and intermediate grades in the hands of experienced teachers will be available for observation by those who desire to familiarize themselves with procedures in carrying out the plan of progressive education at those levels.

The demonstration class for intermediate grades will attempt to meet requested problems from teachers. The activity program, using limited materials, on such units as may be requested will be emphasized. Work applicable to rural schools will be given.

The primary demonstration will be given by Miss Frances Harriman, one of the outstanding primary teachers of the Winnetka System, and the intermediate demonstration will be given by Miss Alice Pierce, Critic of rural teaching Cortland Normal School.

Unit Planning in Progressive Schools, 3 hours, Miss Barber

The special work in teaching through activities, this course combining with theory, 2 hours, and observation, 1 hour, either primary or intermediate, has proved during the last five summers to be most popular with a large number of teachers representing schools located in the county, in villages, and in cities.

Contemporary American Drama, 3 hours, Mr. Ahlberg

A new course given for those desiring credit toward a fourth year and designed to make the student acquainted with representative types of American plays and techniques of the theatre through the reading of significant dramas of today. Consideration will be given to American drama not only as to its artistic merit but as to its reflection of the contemporary American scene. Class discussions, reports.

Advanced Human Physiology, 2 hours, Mr. Bowers

A two hour lecture course with quizzes, requiring much reference material and placing emphasis on the human organism, with such illustrations and demonstrations from other forms of life as may be deemed particularly pertinent. Designed to give the general student a thorough appreciation of the essentials of structure, the vital processes, and the logical care of his own body and of those of his pupils.

Modern Social and Economic Trends I, 3 hours, Mr. Biddle

Modern social and economic trends are studied in the light of their historical background. Special emphasis are placed upon urban life, agrarian problems and the growth of industrial, labor and social problems as they are effected by our technological society. Readings in the fields of economics and sociology will be required to supplement the lectures.

Contemporary Civilization, 3 hours, Mr. Biddle

This course analyzes twentieth century civilization. Political, social and economic world problems are studied in the light of present day situations. Governments of the major nations of the world such as Nazism, Fascism, Communism and Parliamentary government will be interpreted by means of lectures, readings and special topics.
